

### Class Three Multiplication Tables term 3

Dear Parents,

We have been working hard to learn our tables and are making great progress. Next week we will be re starting our weekly times tables sessions in class. Please assist your children in becoming confident with the tables set out below. This could include counting in the given number, reciting the table, asking questions from within the table and discussing real life problems (i.e. 4 children each want 2 fish fingers, how many do I need ?)

Alongside learning the multiplication facts, we would like the children to know the associated division facts (i.e.  $2 \times 4 = 8$  so 8 divided by 2 = 4, or I have 8 fish fingers to share equally between 4 children, how many can they each have?)

Tuesday 13.01.09      2 x table (multiplication only)

Tuesday 20.01.09      5 x table (multiplication only)

Tuesday 27.01.09      10 x table (multiplication only)

Tuesday 03.02.09      2 x table (division only)

Tuesday 10.02.09      5 x table (division only)

Tuesday 24.02.09      10 x table (division only)

#### **Milestone 1 test**

In late January, Mrs Thomas will be testing those children who are really confident with the x2, x5 and x10 tables. As well as testing the children on multiplication and division, she will also ask them to solve worded problems using these tables. Once a pupil reaches milestone 1, we will then send you a revised list of the new tables which we would like them to learn.

If you have any queries, please do not hesitate to see me.

Ms Ovigne
